

Parker Lemery

(802) 238-8293 | parkerlemery@gmail.com | parkerlemery.com | Columbus, OH

EDUCATION

The Ohio State University, College of Engineering

Bachelor of Science in Computer Science & Engineering

- Specialization: Artificial Intelligence
- Dean's List: 4/4 semesters | GPA: 3.79

Columbus, OH

Expected Graduation: April 2028

WORK EXPERIENCE

Waferfab Manufacturing Operator

May 2026 – August 2026

GlobalFoundries

Essex Junction, VT

- Earned 12 tool certifications across three distinct semiconductor manufacturing toolsets and received two Appreciation Awards
- Reduced average tool qualification downtime by 42.9% by restructuring wait-time intervals across a typical 7-run qual sequence
- Followed strict cleanroom protocols and standard operating procedures to maintain wafer quality and process consistency
- Monitored production equipment performance and documented process data to support fab yield and quality targets

AI Trainer

May 2025 – February 2026

Outlier AI

Remote

- Designed 200+ calculus problems to test four large language models, iteratively refining problem complexity and structure to achieve approximately 12.5% model failure rate
- Developed custom evaluation rubrics categorizing errors as catastrophic failures, calculation mistakes, or formatting and display issues
- Analyzed failure patterns to identify weaknesses in AI mathematical reasoning and provided actionable feedback for model improvement

Lead Pizza Chef

June 2021 – August 2024

Cucina Antica

Shelburne, VT

- Oversaw the daily operations of the pizza kitchen, ensuring timely and high-quality preparation of a wide range of pizza offerings
- Led and coordinated a team of 4 staff, delegating tasks to maintain efficiency and smooth service during peak hours
- Trained 6 new staff for positions throughout the kitchen to maximize productivity and ensure consistent food quality

PROJECTS

Academic Performance App & Grade Tracker

Tech Stack: Swift, SwiftUI, PDFKit, JavaScript, Node.js, Express.js, OpenAI API, Canvas LMS API, Render, Supabase

- Built full-stack iOS app with SwiftUI frontend and Node.js/Express backend, using Supabase PostgreSQL with Row Level Security and Google OAuth to enable secure, multi-device course and grade tracking
- Engineered Canvas LMS integration with a searchable picker across 50 universities and a 5-level fallback course matching algorithm to reliably fetch assignments and grades across inconsistent institutional data
- Integrated OpenAI GPT-4o-mini via an Express.js backend proxy, using prompt engineering and a structured JSON schema to parse syllabus PDFs and extract course metadata, assignment categories, weights, and due dates
- Developed a 4-tool predictive analytics system including weighted grade simulation, GPA projection, target score calculation, and effort-impact ranking

Claude Usage

Tech Stack: Swift, SwiftUI, Sparkle, OAuth, Keychain, Apple Notarization

- Built a native macOS menu-bar app showing live usage limits, chat context size, and per-project cost estimates by combining Anthropic's internal usage API with local Claude Code session-log parsing
- Implemented Keychain-based OAuth to reuse an existing Claude Code session, with automatic token refresh and rate-limit backoff
- Shipped a signed, notarized release pipeline with hardened-runtime signing and EdDSA-verified Sparkle auto-updates

Weather Dashboard

Tech Stack: React 19, TypeScript, Tailwind CSS, Vite, Recharts, Open-Meteo API, Render

- Built a responsive React + TypeScript weather dashboard with auto-geolocation, multi-city favorites, 7-day forecasts, 24-hour temperature trends visualized with Recharts, and real-time data from the Open-Meteo API
- Engineered a custom useWeather hook with useReducer for typed async state management and a dynamic theme system mapping 24 WMO weather codes to contextual icons and CSS gradient themes
- Wrote 33 tests using Vitest and React Testing Library covering hooks, components, and async state transitions

LEADERSHIP

Theta Tau Professional Engineering Fraternity

April 2025 – Present

House Manager, Head Website Chair, Project Chair

Columbus, OH

- House Manager (August 2026 – Present): Manage a \$3,000 house budget, oversee facility operations and maintenance, and maintain communication with the house ownership group for a 40-member chapter
- Project Chair (January 2026 – Present): Plan and lead a budgeted house improvement project for the chapter
- Head Website Chair (August 2026 – Present): Manage the chapter website and an automated GroupMe command bot

SKILLS

Professional Skills: Team Leadership, Collaboration, Communication, Time Management, Critical Thinking, Project Management

Languages & Frameworks: Swift, SwiftUI, JavaScript, TypeScript, Java, Python, C, MATLAB, HTML, Node.js, Express.js

Tools & Platforms: Git, Render, Xcode, VS Code, Claude Code, OpenAI API, Canvas LMS API, Supabase, REST APIs, JSON
