

Parker Lemery

Columbus, OH | (802) 238-8293 | parkerlemery@gmail.com | parkerlemery.com

EDUCATION

The Ohio State University, College of Engineering

Bachelor of Science in Computer Science & Engineering

Specialization: Artificial Intelligence

Columbus, Ohio

Expected Graduation: April 2028

Dean's List: 3/3 Semesters - GPA: 3.791

WORK EXPERIENCE

AI Trainer

May 2025 – February 2026

Outlier AI | Remote

- Designed 200+ calculus problems to test four large language models, iteratively refining problem complexity and structure to achieve approximately 12.5% model failure rate.
- Developed custom evaluation rubrics categorizing errors as catastrophic failures, minor calculation mistakes, or formatting and display issues.
- Analyzed failure patterns to identify weaknesses in AI mathematical reasoning and provide actionable feedback for model improvement.

Lead Pizza Chef

June 2021 – August 2024

Cucina Antica | Shelburne, VT

- Oversaw the daily operations of the pizza kitchen, ensuring timely and high-quality preparation of a wide range of pizza offerings.
- Led and coordinated a team of 4 staff, delegating tasks to maintain efficiency and smooth service during peak hours.
- Trained 6 new staff for positions throughout the kitchen to maximize productivity.

PROJECTS

Academic Performance App & Grade Tracker

Tech Stack: Swift, SwiftUI, PDFKit, JavaScript, Node.js, Express.js, OpenAI API, Canvas LMS API, Render, Supabase

- Built full-stack iOS app with SwiftUI frontend and Node.js/Express backend, using Supabase PostgreSQL and Google OAuth to support secure, multi-device course and grade tracking across 50 universities.
- Engineered Canvas LMS integration with a searchable university picker and a 5-level fallback course-matching algorithm to reliably fetch assignments, weights, and grades across inconsistent institutional data.
- Integrated OpenAI GPT-4o-mini via Express.js backend proxy using prompt engineering and structured JSON schema to parse syllabus PDFs, extracting course metadata, assignment categories, weights, and due dates.
- Developed a 4-tool predictive analytics system including weighted grade simulation, GPA projection, target score calculation, and effort-impact ranking.

Weather Dashboard

Tech Stack: React 19, TypeScript, Tailwind CSS, Vite, Recharts, Open-Meteo API, Render

- Built a responsive React + TypeScript weather dashboard with auto-geolocation, multi-city favorites, 7-day forecasts, 24-hour temperature trends visualized with Recharts, and real-time data from the Open-Meteo API.
- Engineered a custom useWeather hook with useReducer for typed async state management and a dynamic theme system mapping 20+ WMO weather codes to CSS gradients.
- Wrote 33 tests using Vitest and React Testing Library covering hooks, components, and async state transitions.

Real Time Currency Converter

Tech Stack: JavaScript, HTML, CSS, ExchangeRate API

- Built a real-time currency converter using JavaScript, HTML, and CSS, fetching live exchange rates from the ExchangeRate API for 5 global currencies.
- Implemented asynchronous API calls with fetch() and async/await to retrieve and display current conversion rates.
- Designed a clean UI with input validation and error handling for invalid and duplicate currency selections.

SKILLS

Professional Skills | Team Leadership, Collaboration, Communication, Time Management, Critical Thinking.

Languages & Frameworks | Swift, SwiftUI, JavaScript, TypeScript, Java, Python, C, MATLAB, HTML, Node.js, Express.js.

Tools & Platforms | Git, Render, Xcode, VS Code, Claude Code, OpenAI API, Canvas LMS API, Supabase, REST APIs, JSON.
